

## THE EIGHT INTERPRETATIONS OF THE SENTENCE

### Two students studied three theorems of all theories

There are two students (Mary and Bill) each of which studied three theorems that belong to all (relevant) theories (Tr1, Tr2, Tr3, Tr4).

$$\begin{aligned} &\exists x_1 \exists x_2 \exists y_1 \exists y_2 \exists y_3 \\ &[x_1 \neq x_2 \wedge y_1 \neq y_2 \neq y_3 \wedge \\ &\forall x [(x = x_1 \vee x = x_2) \rightarrow \text{student}'(x)] \wedge \\ &\forall y [(y = y_1 \vee y = y_2 \vee y = y_3) \rightarrow \\ &\quad (\text{theorem}'(y) \wedge \forall z [\text{theory}'(z) \rightarrow \text{belong}'(y, z)])] \wedge \\ &\forall x \forall y [((y = y_1 \vee y = y_2 \vee y = y_3) \wedge (x = x_1 \vee x = x_2)) \rightarrow \text{study}'(x, y)] \end{aligned}$$

Conflates in 1.

$$0 \ 0 \ 0 \ 1$$

There are two students (Mary and Bill) who chose three theorems belonging to all relevant theories and studied them; they may choose different theorems.

$$\begin{aligned} &\exists x_1 \exists x_2 [x_1 \neq x_2 \wedge \\ &\forall x [(x = x_1 \vee x = x_2) \rightarrow \text{student}'(x)] \wedge \\ &\forall x [(x = x_1 \vee x = x_2) \rightarrow \\ &\quad \exists y_1 \exists y_2 \exists y_3 [y_1 \neq y_2 \neq y_3 \wedge \\ &\quad \forall y [(y = y_1 \vee y = y_2 \vee y = y_3) \rightarrow \\ &\quad \quad (\text{theorem}'(y) \wedge \\ &\quad \quad \forall z [\text{theory}'(z) \rightarrow \text{belong}'(y, z)])] \wedge \\ &\quad \forall y [(y = y_1 \vee y = y_2 \vee y = y_3) \rightarrow \text{study}'(x, y)]]] \end{aligned}$$

Conflates in 3.

$$0 \ 0 \ 0 \ 0$$

Conflates in 3.

$$0 \ 0 \ 0 \ 1$$

There are two students (Mary and Bill) and, for each (relevant) theory, three theorems that belong to it. Each student studies all those theorems

$$\begin{aligned} &\exists_{x_1}\exists_x [x_1 \neq x_2 \wedge \\ &\forall_x [(x = x_1 \vee x = x_2) \rightarrow \text{student}'(x)] \wedge \\ &\forall_z [\text{theory}'(z) \rightarrow \\ &\quad \exists_{y_1}\exists_{y_2}\exists_{y_3} [y_1 \neq y_2 \neq y_3 \wedge \\ &\quad \forall_y [(y = y_1 \vee y = y_2 \vee y = y_3) \rightarrow \\ &\quad \quad (\text{theorem}'(y) \wedge \text{belong}'(y, z))] \wedge \\ &\quad \forall_x \forall_y [((y = y_1 \vee y = y_2 \vee y = y_3) \wedge (x = x_1 \vee x = x_2)) \\ &\quad \quad \rightarrow \text{study}'(x, y)]]] \end{aligned}$$

Conflates in 6.

$$0 \ 010 \ 00$$

There are three theorems (Th1, Th2 and Th3) that belong to all of the (relevant) theories, and for each theorem there are two students, possibly different, who study it.

$$\begin{aligned} &\exists_{y_1}\exists_{y_2}\exists_{y_3} [y_1 \neq y_2 \neq y_3 \wedge \\ &\forall_y [(y = y_1 \vee y = y_2 \vee y = y_3) \rightarrow \\ &\quad (\text{theorem}'(y) \wedge \forall_z [\text{theory}'(z) \rightarrow \text{belong}'(y, z)])] \wedge \\ &\forall_y [(y = y_1 \vee y = y_2 \vee y = y_3) \rightarrow \\ &\quad \exists_{x_1}\exists_{x_2} [x_1 \neq x_2 \wedge \\ &\quad \forall_x [(x = x_1 \vee x = x_2) \rightarrow \text{student}'(x)] \wedge \\ &\quad \forall_x [(x = x_1 \vee x = x_2) \rightarrow \text{study}'(x, y)]]] \end{aligned}$$

Conflates in 8.

$$01 \ 0 \ 01$$

For each (relevant) theory there are three, possibly different, theorems. For each theorem, there are two, possibly different, students who study it.

$$\begin{aligned} &\forall_z [\text{theory}'(z) \rightarrow \\ &\quad \exists_{y_1}\exists_{y_2}\exists_{y_3} [y_1 \neq y_2 \neq y_3 \wedge \\ &\quad \forall_y [(y = y_1 \vee y = y_2 \vee y = y_3) \rightarrow \\ &\quad \quad (\text{theorem}'(y) \wedge \text{belong}'(y, z))] \wedge \\ &\quad \forall_y [(y = y_1 \vee y = y_2 \vee y = y_3) \rightarrow \\ &\quad \quad \exists_{x_1}\exists_{x_2} [x_1 \neq x_2 \wedge \\ &\quad \quad \forall_x [(x = x_1 \vee x = x_2) \rightarrow \text{student}'(x)] \wedge \\ &\quad \quad \forall_x [(x = x_1 \vee x = x_2) \rightarrow \text{study}'(x, y)]]]] \end{aligned}$$

For each (relevant) theory there are two, possibly different, students (who chose them). For each student, there are three, possibly different, theorems who are studied by that student.

$$\forall_z [\text{theory}'(z) \rightarrow \exists_{x_1} \exists_{x_2} [x_1 \neq x_2 \wedge \forall_x [(x = x_1 \vee x = x_2) \rightarrow \text{student}'(x)] \wedge \forall_x [(x = x_1 \vee x = x_2) \rightarrow \exists_{y_1} \exists_{y_2} \exists_{y_3} [y_1 \neq y_2 \neq y_3 \wedge \forall_y [(y = y_1 \vee y = y_2 \vee y = y_3) \rightarrow (\text{theorem}'(y) \wedge \text{belong}'(y, z))] \wedge \forall_y [(y = y_1 \vee y = y_2 \vee y = y_3) \rightarrow \text{study}'(x, y)]]]]]$$

For each (relevant) theory there are two, possibly different, students (who chose them) and three, possibly different, theorems. Each student who chose a given theory studies all the theorems of that theory.

$$\forall_z [\text{theory}'(z) \rightarrow \exists_{x_1} \exists_{x_2} \exists_{y_1} \exists_{y_2} \exists_{y_3} [x_1 \neq x_2 \wedge y_1 \neq y_2 \neq y_3 \wedge \forall_x [(x = x_1 \vee x = x_2) \rightarrow \text{student}'(x)] \wedge \forall_y [(y = y_1 \vee y = y_2 \vee y = y_3) \rightarrow (\text{theorem}'(y) \wedge \text{belong}'(y, z))] \wedge \forall_x \forall_y [(x = x_1 \vee x = x_2) \wedge (y = y_1 \vee y = y_2 \vee y = y_3) \rightarrow \text{study}'(x, y)]]]$$

There are two students. Each student chooses three theorems that belong to any of the (relevant) theories and studies them.

$$\exists_{x_1} \exists_{x_2} [x_1 \neq x_2 \wedge \forall_x [(x = x_1 \vee x = x_2) \rightarrow \text{student}'(x)] \wedge \forall_x \forall_z [(x = x_1 \vee x = x_2) \wedge \text{theory}'(z) \rightarrow \exists_{y_1} \exists_{y_2} \exists_{y_3} [y_1 \neq y_2 \neq y_3 \wedge \forall_y [(y = y_1 \vee y = y_2 \vee y = y_3) \rightarrow (\text{theorem}'(y) \wedge \text{belong}'(y, z))] \wedge \forall_y [(y = y_1 \vee y = y_2 \vee y = y_3) \rightarrow \text{study}'(x, y)]]]]]$$
