HTML 4.01 Entities Reference

[◀ Previous](#) [Next ▶](#)

HTML 4.01 supports the ISO 8859-1 (Latin-1) character set.

The lower part of ISO-8859-1 (codes from 0-127) is the [original 7-BIT ASCII standard](#). Most of these characters can be used without a character reference.

The higher part of ISO-8859-1 (codes from 160-255) can all be used using character entity names.

Note that the entity names are case sensitive.

ASCII Entities with new Entity Names

Result	Description	Entity Name	Entity Number
"	quotation mark	"	"
'	apostrophe	' (does not work in IE)	'
&	ampersand	&	&
<	less-than	<	<
>	greater-than	>	>

ISO 8859-1 Symbol Entities

Result	Description	Entity Name	Entity Number

Want To Be A Web Master?

If you want to be a Web Master, you will have to host your web site with an ISP (Internet Service Provider).

Founded in 1996 in North Carolina, AIT Inc. provides web hosting and ecommerce services to more than 190,000 domains in 107 countries. Shared, dedicated, and collocated hosting plans for both Linux and Windows users are available along with the industry's most lucrative reseller program. AIT has won acclaim as one of the fastest growing technology companies in North America by Inc. Magazine and by Deloitte & Touche.

As low as \$39.95 per month for Dedicated Hosting! Choose from managed or fully managed options. Plans begin with an 80 GB hard drive and 1 terabyte of data transfer. AIT hosting packages are the ideal environment for web developers, designers, hosting resellers, entrepreneurs, and business IT departments to house your servers off site.
